CUSTOM REFUSE COLLECTION

THE SMART MOVE

As a business owner, you know that keeping your fixed costs at a minimum is the best way to maximize profits. You've taken the time to research your costs for

If your needs are minimal, select our 96 gallon, curbside service at only \$14.12 per month.

electric and natural gas and get the best rate, you diligently shop your suppliers for the best deal on everything from coffee filters to copy paper and **yet you still continue to**

throw money away, literally, on your refuse removal service. If you have ever had to sign a contract, send an employee out to jump up and down on the dumpster, had to have employee pick up around the dumpster after it overflowed onto the ground or wait until the dumpster was empty to throw away material, you have wasted money. Take just a moment and explain your needs to us and let us design a custom refuse removal service for you, we are sure you will find it time well spent.

NO CONTRACT

We expect you to continue to do business with us because **it is the best service and value for your dollar**, not because we locked you into a contract. We also respect that as your needs change, you need to adjust the services you purchase to those needs. Can you honestly say what your refuse needs will be two years from now? With flexible service from a dedicated and motivated local provider, you can rest assured that as your needs change so will your refuse service.

PAY JUST FOR THE SERVICE YOU NEED

Are you a small business with just a couple of bags per week of refuse? Are you a medium to large sized business that makes 40 yards of refuse per week? The City of Warren collects 5 days a week and can offer **single or multiple day collection** as well as containers sized to your needs. The combination of these features is what allows us to match the service exactly to your needs .

CONVENIENCE

Do you ever feel that you will suffocate under the volumes of papers and bills that inundate your office? Eliminate at least some of that paper by contracting with the City of Warren for your refuse services. The City will include the charges on your existing utility services bill therefore eliminating one extra bill, one more check to write and one more letter to mail every month!

WE RESPOND TO YOU

When the situation arises that you need an extra pickup, can your current service be there when you need them or are they collecting in Youngstown today and will try to get to you tomorrow? We only collect in the City of Warren and the immediately surrounding area so Monday to Friday **we are in town to respond to your needs** and we can collect on weekends with prior arrangements if you need that service. Give us a call and see if we fit your needs today.
